

RD Certificate Number: EWS1196A

Duratherm® HFO spray applied polyurethane foam for stabilisation and insulation

Description

This is an assessment of Duratherm® spray applied HFO blown polyurethane foam for roof stabilisation and insulation. Applications assessed are for stabilisation and insulation and insulation in both new and existing constructions.

Duratherm® is a 2-component modified polyurethane rigid foam system suitable for use in pitched roof applications. The material is formed in situ by mixing isocyanate and resin within the nozzle of a spray gun during the spraying process.

Scope of Registration

Due to space limitations, the Registered Detail certificate should be consulted for the full scope of this registration.

Validity

This system has been checked for compliance in accordance with English, Welsh and Scottish Building Regulations.

Registration was first issued on 13/01/20 and is valid until 13/05/22 providing there are no amendments to applicable regulations.

Issue dated 19/07/2021
