

RD Certificate Number: EWS1132

energystore TLA

Description

This is an assessment of the energystore TLA.

energystore TLA is a superlight EPS bead aggregate that is mixed with cement, water and other aggregates to produce an installed product that has thermal and lightweight characteristics, as well as a good acoustic performance. To be used as a thermally insulating floor and flat roof screed or as a lightweight intermediate floor screed.

energystore TLA should only be mixed and installed by contractors that have been assessed and approved by energystore Ltd.

Where required a Vapour Control Layer should be installed on the warm side of the insulation.

Scope of Registration

Due to space limitations, the Registered Detail certificate should be consulted for the full scope of this registration.

Validity

This system has been checked for compliance in accordance with English, Welsh & Scottish Building Regulations.

Registration was first issued on 06/06/19 and is valid until 06/10/22 providing there are no amendments to applicable regulations.

Issue dated 22/10/2021
