# LABC Registered Construction Details Masonry

### **Registration Number: E2MCFF7**

#### **Build Up**

**External Masonry Cavity Wall** 

Masonry Outer Leaf ( $\lambda = 0.77$ )

100mm Aircrete Block Inner Leaf ( $\lambda = 0.11 \text{ W/mK}$ )

**Full Fill Insulation** 

Steel Lintel, Open Back

(No continuous base plate)

## LABC Registered Construction Details Masonry

### Calculated ψ-values

	Inner leaf blockwork
	Aircrete Block λ = 0.11 W/mK
<b>Cavity Insulation</b>	ψ-value W/mK
<b>100mm</b> λ=0.037	0.279
150mm λ=0.037	0.276
<b>100mm</b> λ=0.032	0.284
150mm λ=0.032	0.281

#### **Points to Watch**

- In certain situations, the lintel may also require fire resistance.
- A flexible sealant should be used between all interfaces of the internal air barrier and the window / door frame members.
- Cavity should be closed with a proprietary cavity closer or block of insulation.
- Ensure the cavity closer is in contact with the insulation within the cavity and the window / door frame.
- Ensure cavities are kept clean of mortar snots and other debris during construction.
- Ensure that a 3mm thick lintel is available for the required opening width.
